DETAILED ACTION

Applicant is notified that the claims have renumbered (plus 1 each) according to Rule 1.126 because the amended claims repeated claim 18.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 19- 33, drawn to the first product, a particle, and the first method, a method to make the particle.

Group II, claim(s) 34, drawn to a second method to make the particle.

Group III, claim(s) 35- 41, drawn to the second product, a fusion protein.

Group IV, claim(s) 42- 51, drawn to the third product, a DNA molecule.

The inventions listed as Groups II- IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a viral particle and method to make to make the particle, the first product and first method to make. The special technical feature is the viral particle.

Groups III and IV are drawn to structurally different products, which do not require each other for their practice and do not share the same or a corresponding technical feature.

Art Unit: 1648

The Group II invention is drawn to a second method to make the particle which has different method steps. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Since the special technical feature of the Group I invention is not present in the Group III-XI claims, and the special technical features of the Group III-XI inventions are not present in the Group I claims, unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
